Internet Resources:

Fort Frye Local Schools recognizes that families may need access to WiFi internet services during this extended period of school closure. We wanted to share some ways our families might access free WiFi.

*Internet is always available at our four district buildings. We know that you cannot get inside the buildings, however the WIFI does reach into the parking lots. If you are using a school owned Chromebook, they will connect to the Internet automatically. If you are using a personal device, please connect to our "Fort Frye Guest" WIFI. Below are a couple of other WiFi resources if you don't currently have internet at your home.

*Spectrum Internet is offering free Internet for 60 Days. You must not have had Spectrum service for 30 days, no outstanding debt with Spectrum, must be located in their service area (866)-653-5687. Spectrum is also offering all of their nationwide access points open to the public so you may be able to connect to internet now for free for 60 days.

*Washington State Community College also has free WIFI in their parking lots.

*Contact your cell phone provider to see if they are offering free hot spot or home WiFi for educational purposes.
