This page must be signed and returned before a student is issued any school-owned equipment or is permitted to use the district's internet.

Use of the Internet is a privilege, not a right. The Board of Education's Internet connection is provided for educational purposes only. Unauthorized and inappropriate use will result in a cancellation of this privilege.

The district has implemented the use of a Technology Protection Measure which is a specific technology that will protect against (e.g., block/filter) Internet access to visual displays that are obscene, child pornography or harmful to minors. The district also monitors online activity of students in an effort to restrict access to pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. Nevertheless, parents/guardian are advised that determined users may be able to gain access to information, communication and/or services on the Internet which the board has not authorized for educational purposes and/or which they and/or their parents/guardians may find inappropriate, offensive, objectionable or controversial. Parent/guardians assume this risk by consenting to allow their students to participate in the use of the Internet. Students accessing the Internet through the school's computers assume personal responsibility and liability, both civil and criminal, for unauthorized or inappropriate use of the Internet.

The district has the right to monitor, review and inspect any directories, files and/or messages residing on or sent using the district's computers/network. Messages relating to or in support of illegal activities will be reported to the appropriate authorities.

As the **parent/guardian** of this student, I have read the Student Network and Internet Acceptable Use and Safety Policy and Guidelines, and have discussed them with my child. I understand that student access to the Internet is designed for educational purposes and that the district has taken available precautions to restrict and/or control student access to material on the Internet that is obscene, objectionable, inappropriate and/or harmful to minors. However, I recognize that it is impossible for the district to restrict access to all objectionable and/or controversial materials that may be found on the Internet. I will not hold the district (or any of its employees or administrators) responsible for materials my child may acquire or come in contact with while on the Internet. Additionally, I accept responsibility for communication to my child guidance concerning his/her acceptable use of the Internet. I further understand that individuals and families may be liable for violations.
